

Pre Bid Queries regarding RONET and ECI 360 Mobile App

Sr. No.	Query	Remarks
1.	As per RFP vendor have submit Rs 1,00,000/- and Rs. 2000/- in respect of EMD and Tender Doc Fee. As per the GFR rules, EMD and Tender fee are exempted for those who have valid NSIC certificate. We request you to kindly exempt the EMD and tender fee for those who have valid NSIC Certificate.	No changes
2.	As per the RFP vendor need to develop Web application and Mobile application but as per the price schedule vendor have to give price for major task like polling station, EVM – VVPAT, Election Material etc. Kindly confirm us what we have to cover in our proposal.	As all these major tasks are the part of RONET and ECI 360. So, proposal should be submitted with task wise price for both web and mobile application.
3.	As per RFP, it only mentioned what activity or sub head for each module but for our development, we need to understand the complete process and activity in each module like in case of polling station we just need to maintain their information or what else activity.	To understand the flow of the applications for all Major heads and Sub activities, you are requested to visit the DEO of Ludhiana District. As both the applications will be developed under his supervision. Contact detail of Ludhiana DEO is as following: <ol style="list-style-type: none"> 1. Sh. Ravi Bhagat, IAS DC Ludhiana – 09877861786. 2. Ms.ApneetKaur, IAS ADC Ludhiana - 08968541313
4.	Need clarification for all major tasks we need to develop. Kindly give us clarification that module which will be developed for web application and what module will be for mobile application.	All the major tasks are the part of RONET and ECI 360. Whereas the RONET and ECI 360 modules are concerned, both the application has to be developed for Web application as well as for Mobile application. In section 2 of tender document user level/ stakeholder has been defined with the availability of the application. In addition to this it has been defined in the

		“Detailed scope of work” through a table having a column heading “ By Whom ”in which it clearly defines the user level by whom that major task will be handled.
5.	We need to know the total number of user who will be using the RONET Web Application.	Total number of users for RONET will be minimum 150 in which there will be 5 users at ECI level, 5 users at CEO level, 22 users at DEO Level and 117 users at ERO Level.
6.	Can the Web application be developed in Open Source technology i.e. PHP, MySQL.	No changes
7.	Need to understand the timeline mentioned in the scope of work.	Timeline to deliver the application is defined in the tender document i.e. 25-12-2016. As the application will be used in the upcoming Assembly Election 2017.
8.	Any Onsite manpower required? If required then for how many year.	Onsite Manpower is required only for six months at the time of implementation of applications. Afterwards the company should provide the remote assistance for maintenance/ updation.
